## **Redeveloped coal site brings economic benefit to Marcellus Basin** *Smart Sand delivers positive impact to Greene County*

**Waynesburg, PA March 10, 2022, Smart Sand, Inc.** (NASDAQ: SND) (the “Company”) recently celebrated the grand opening of its sand transloading terminal in Waynesburg, Pennsylvania. The transformation of a decades old, inactive coal facility into an operating sand terminal streamlines logistics and aids in delivering a reliable source of high-quality Wisconsin northern white sand into the basin. “Our new unit-train capable terminal in Waynesburg, Pennsylvania, allows us to continue growing our presence in the Marcellus Basin,” stated John Young, Chief Operating Officer of Smart Sand.

The Ribbon Cutting event was attended by State Senator Camera Bartolotta and State Representative Pam Snyder, Greene County Commissioners Mike Belding, Betsy McClure, Blair Zimmerman, and township officials.

Beyond being grateful for the potential increases in jobs for the area, Representative Snyder expressed her appreciation, “Thanks Smart Sand for having the vision to lower the carbon footprint, there will be fewer trucks on the road hauling sand.” Smart Sand believes that within the first year of operations, the terminal could realize a three-million mile reduction in truck miles and a reduction of 13,000 tons of CO2 emissions.

Mr. Young concluded, “I’m proud that our investment here plays a small part in Pennsylvania’s economic future and our country’s energy independence. By restoring this site, we expect to generate jobs and economic growth for southwest Pennsylvania for a long time.”

### **About Smart Sand Mine to Wellsite Solutions**

We are a fully integrated frac sand supply and services company. We produce low-cost, high quality Northern White frac sand and offer proppant logistics, storage and management solutions to our customers through our in-basin transloading terminals and our SmartSystem™ wellsite proppant storage capabilities. We provide our products and services primarily to oil and natural gas exploration and production companies and oilfield service companies. We own and operate premium frac sand mines and related processing facilities in Wisconsin and Illinois, which have access to three Class I rail lines, allowing us to deliver products substantially anywhere in the United States and Canada.
